

Summary:

As a practicing visual artist and graduate, I have valuable skills and knowledge from every course, and the arts are part of my everyday life. In addition to my education, I have over a year experience in the veterinary field working to provide care and comfort to all animals, growing my skills in communication and empathy. I am able to adapt to all challenges presented to me, and bring my experience from the arts, animals, and people into projects to create a unique insight. Being an artist has allowed me to relate more to the world. In the future, I plan to use these experiences and skills to become a successful and practicing artist.
